“An innovation in
cable management”

SNAKE[®] CABLE GUIDE

A versatile cable management solution designed to prevent technical hiccups from happening while guiding cables. The Snake cable guide can be mounted onto single tubes, square - or triangle truss 30 and 40. Different height variations are available in both a silver and black version.

KEY FEATURES

Unique hinges

The pivoting hinges of the Snake assure the cables are gently bent around a minimum diameter, making it especially well-suited for less resilient cables such as fibre optic cables.

Minimal horizontal movement

Thanks to the interlocking mechanism of the hinges, lateral movement while hoisting the truss up and down is minimized.

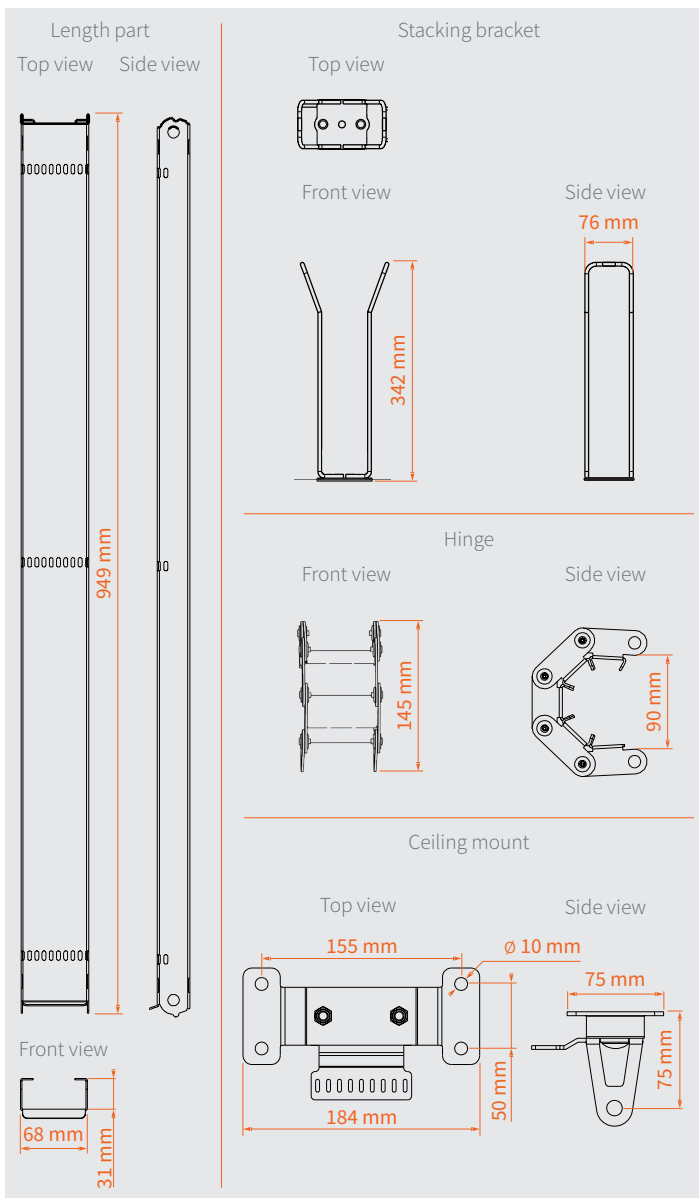

Designed for intense use

With its brass bearings, the Snake cable guide is well built for many years of high performance use.
