“An innovation in  
cable management”

# SNAKE<sup>®</sup> CABLE GUIDE

A versatile cable management solution designed to prevent technical hiccups from happening while guiding cables. The Snake cable guide can be mounted onto single tubes, square - or triangle truss 30 and 40. Different height variations are available in both a silver and black version.

## KEY FEATURES

### Unique hinges

The pivoting hinges of the Snake assure the cables are gently bent around a minimum diameter, making it especially well-suited for less resilient cables such as fibre optic cables.

### Minimal horizontal movement

Thanks to the interlocking mechanism of the hinges, lateral movement while hoisting the truss up and down is minimized.

### Designed for intense use

With its brass bearings, the Snake cable guide is well built for many years of high performance use.
